

# eLEARNING Platform

Cargo Connections is an ISO 9001 and ISO 14001 certified general cargo network established in the summer of 2014 to provide independent freight forwarders access to a trusted, worldwide network of agents who could handle their shipments, whilst working professionally and safely under strict Membership Rules.

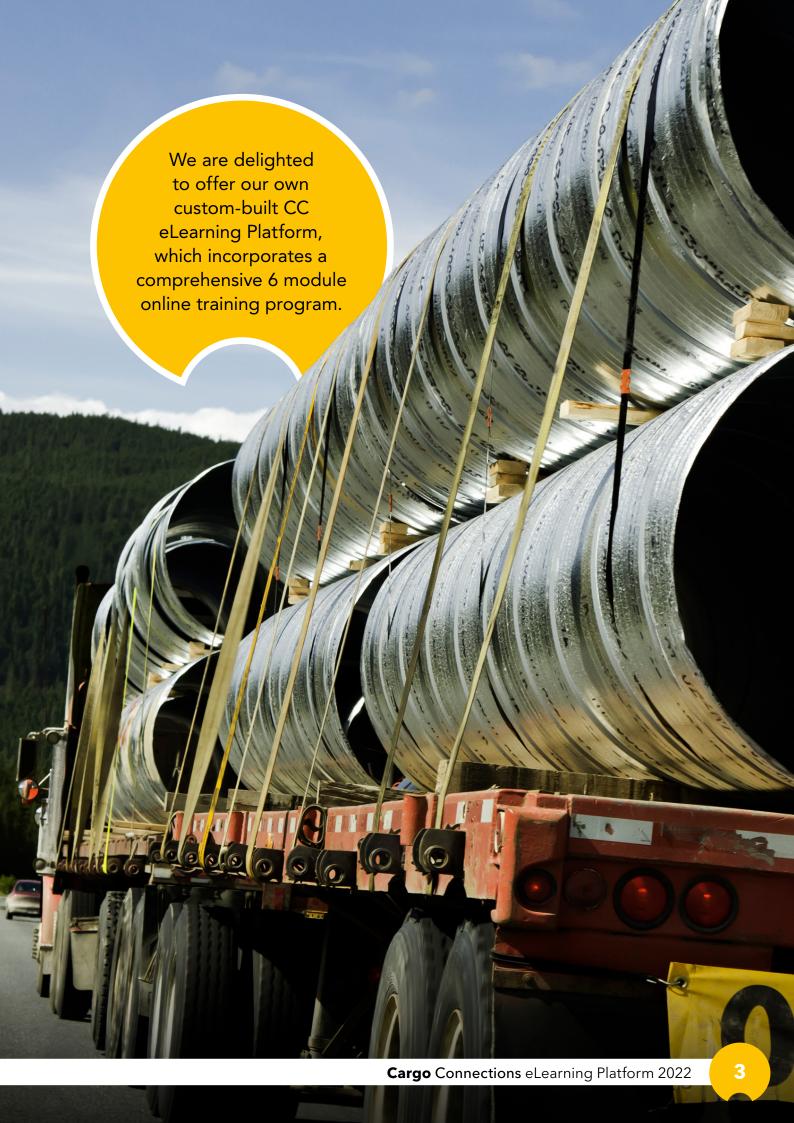

We understand that one of the main challenges in our industry is the lack of training and staff development, especially with new and young staff members. Practical 'on the job' experience needs to be paired with theoretical knowledge, as this leads to a deeper understanding. However, specialist training courses and workshops are often expensive and involve travel and time away from the office. So, we are delighted to offer our own custom-built Cargo Connections eLearning Platform, which incorporates a comprehensive 6 module online training program.

The clear and highly effective video based training includes narration, graphs, diagrams, video footage and photographs. When completed, the user will understand the practical, operational and engineering aspects of heavy transport and lifting projects.

CC works hard to develop new membership benefits and has invested in both the bespoke training and the eLearning platform so that it can be provided at a heavily reduced rate.

Future plans include training related to general cargo.

Our custom built eLearning Platform incorporates a comprehensive 6 module online training program.

Besides the benefits of not having to travel to a training centre and sit in a classroom for long periods, there are additional advantages to eLearning such as being able to stop the training at your convenience and start again when you are ready.

We have taken this a step further by breaking the training into 10 minute sessions which will be long enough to get an important point across but short enough not to disrupt your day.

The training includes 11 multiple

choice tests to ensure that each subject has been fully understood before continuing to the next topic.

Each registered user receives a personal log-in so that they can train at their own pace.

The personal profile page contains a progress bar and a list of achievements so you can track your advancement through the course. Upon completion you will receive a Certificate via email.

### **COMPANY WIDE**

The training is ideal for staff who are at the beginning of their career in heavy transport, offering employers a time saving and low cost alternative to workshops and seminars. However, as the training is comprehensive, senior level professionals will also benefit from the practical, scenario and video based course as it will encourage reflection on current practices.

## MODULES

#### Here is the schedule of modules and sessions.

#### **MODULE 1: TERMINOLOGY**

#### **MODULE 2: DIMENSIONS WEIGHTS & FORCES**

**Gravity & Forces** Laws of Newton & Archimedes

Principle of Moment

#### **MODULE 3: HEAVY TRANSPORT**

Transporters & Trailers Principle Working (1) Principle Working (2) The Stability Area (Plan View)

3 & 4 Point Suspension The Equalizing Effect

The Stability Area

Pull Type & SPMT Capacities

Session 9 The Differences Are Getting Smaller

Session 10 Steering Capabilities

Naming Conventions

The Goose Neck Session 12

Session 13 GroundPressures

Session 15 Structural Stability (1)

Session 16 Hydraulic & Structural Stability (2)

Dolly Transport

Session 18 Long Load Vehicles

#### **MODULE 4: HEAVY LIFTING**

Types Of Cranes What Is A Crane (Principle Of The Lever)

Principle Of The Hoist

The Load Chart Types Of Lifts

Lifting With 2 Cranes

The Tailing Frame

**Ground Pressures** 

Session 10 Load Spreading Options

Session 12

Session 13 Spreader Bars and Lift Beams

A Complex Lift Made Easy

Session 15 Super Lift Attachments

Stability Of The Load Session 16

**Erecting Wind Mills** 

Session 18 The Lift Plan

#### **MODULE 5: JACKING & SKIDDING**

Types Of Jacking Skidding Methods

Jack & Pack

Climbing Jacks

Strand Jacks

Strand Jack Applications

What Is

Coefficient

Of Friction. Different Materials

Hydraulic Skid Shoe

Session 10 Hydraulic Gantry (1)

Hydraulic Gantry (2) Session 11

Session 12

#### **MODULE 6: LOAD OUTS**

Types of Barges

Hydrostatic Particulars

5 Types of Load-Out

**Operations** 

Type 1: Free Floating

Barge, Tidal Conditions

Type 2: Free Floating

Conditions Type 3: Steel Plates, Non-Session 10

Tidal Conditions

Aground
